AI / LLM Engineering Intern — Python — LLM APIs — Node.js — Automation

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on production experience since Feb 2026 across **Python**, **Node.js/Express**, **PHP 8/MySQL** and **Flutter**. Built an **LLM-powered chatbot** on the OpenRouter API with a free-model fallback chain and rate-limit handling, tested AI products for a client as QA, and work on a node-based **automation engine** in a production SaaS. Cut a critical query from **30.7 s to 0.49 s** on a platform serving 2,228 users.

Experienced in client-facing delivery across **five concurrent web, mobile and QA projects**, with **Agile/Scrum**, **Jira** and direct client communication in fluent English. Looking to grow as an engineer working on AI/ML-driven products.

TECHNICAL SKILLS

- **AI and LLM:** LLM API integration (OpenRouter), fallback chains and 429 rate-limit handling, prompt-driven chat interfaces, environment-based secret management, XSS-safe model output, workflow automation, testing of AI products
- **Languages:** JavaScript (ES6+), PHP 8, SQL, Python, Dart, HTML5, CSS3
- **Backend and APIs:** Node.js, Express.js, REST API design and consumption, WebSocket, JWT and Firebase Auth (phone OTP), webhook integrations
- **Frontend and Mobile:** React.js (Vite), Flutter, responsive design, iOS and Android app testing
- **Databases:** MySQL/MariaDB, MongoDB (Mongoose), Redis (ioredis), relational schema design, N+1 query elimination, query optimisation
- **DevOps and Tooling:** Git/GitHub, GitHub Actions, Docker, cPanel/SFTP, XAMPP, ngrok, Postman/curl, staging environment setup
- **Quality and Security:** functional and regression testing, root-cause analysis, tenant-isolation review, XSS remediation, hash-verified backups with tested rollback
- **Practices:** Agile/Scrum, Jira/ClickUp, SRS authoring, acceptance criteria, technical documentation, code review

PROFESSIONAL EXPERIENCE

TrailMarq (Synvex In-House Product)
Software Engineer, Automation Team *Feb 2026 – Present*

- Contribute to a **multi-tenant** B2B CRM and marketing-automation SaaS built on **Node.js/Express**, **MongoDB**, **Redis** and **React/Vite**, including a node-based automation engine.
- Fixed a global express.json webhook parsing bug breaking all Meta webhook callbacks, and a notification de-duplication fault dropping valid alerts after proving a fixed 120-second window was the root cause.
- Led a **forensic audit** of automation, notifications and auth: classified findings by severity and fixed the high-priority ones with **regression verification**, including a **tenant-isolation** gap across the API handlers and an **N+1 query** in the notification write path.
- Remediated an **XSS** vulnerability in the upload flow and added a runMode field with branch logic across the automation engine.

TwoAreOne.love (Tworone LLC)
PHP Backend and Mobile Contributor *Feb 2026 – Present*

- Contribute to a live 10-year-old **PHP 8/MySQL** platform and its **Flutter** mobile app: debugged features, implemented new features and built mobile-facing APIs.
- Removed an **N+1** query from the user-listing path: **30.7 s to 0.49 s** across **2,228 users**; shipped a **206 Partial Content** streaming endpoint for video playback; secured an open photo-upload endpoint.
- Built an iOS build-and-deploy pipeline on Windows without a Mac (Swift toolchain, xtool, **WSL2** USB forwarding, **GitHub Actions**) and cleared **App Store** review to **build 15**.
- Operate **hash-verified backups** with **tested rollback** as the standard release procedure.

Synvex Pvt. Ltd., Islamabad
Technical Project Manager *Feb 2026 – Present*

- Own **five concurrent web, mobile and QA projects**: requirements, SRS, release planning and deployment coordination; maintain a **180+ item Jira** backlog and run sprint planning, stand-ups and retrospectives.
- Primary client contact: triage incoming issues, reproduce faults, route fixes and confirm resolution with the client.

Emilia AI Studio, BulletPro, Veddera Modulars
QA Tester and Client Liaison *2026*

- Functional, **regression** and **UAT** testing with defect triage and release sign-off across AI, mobile and web platforms; direct client feedback loops.

KEY PROJECTS

- **LLM Class Chatbot** – Python stdlib HTTP server, OpenRouter LLM API, free-model fallback chain (429 rate-limit handling), environment-based secret management, **XSS**-safe chat UI.
- **Quick Food – Final Year Project** – **Node.js/Express**, **MySQL**. Food-delivery web application built end to end: REST routes, relational **MySQL** schema, server-rendered views. github.com/Faha61

EDUCATION

Bachelor of Science in Computer Science
The Islamia University of Bahawalpur *Sep 2022 – Jun 2026 (CGPA 3.0/4.0)*

Relevant coursework: Database Programming, Data Structures and Algorithms, Network Systems, Scalable and Cloud Computing, Software Project Management

LANGUAGES

English (fluent – professional client communication), Urdu, Punjabi
